

Coming soon...

Health Source Group values education. As a result of our commitment to improving the lives of people – as one of our providers, patients, or students – we have made it our mission to offer complimentary continuing, professional development courses to train, educate, and enhance the practice of our nursing providers.

The purpose of professional development is to improve practical application, knowledge, and skills in order to facilitate individual and company-wide improvements for the purpose of increasing provider achievement and outcomes.

Professional development and related education benefits nurses, patients, students, and the healthcare industry overall. Professional development increases knowledge thus increasing the quality of care provided to the general public in need. Studies indicate that providers who are actively involved with professional and continuing education coursework state they feel more engaged in the workplace, more confident, and have a higher job satisfaction rate, too!

We ask you to stay tuned and register for our complimentary professional development courses. Below you will get a sneak peak at the courses we plan on offering within the next several weeks, as taught by our valued, compassionate Health Source Group nurses, for our Health Source Group Nurses. For questions, or to teach an upcoming course, please call us at **516-605-1310, ext. 202**. We look forward to learning and growing with you!
